Field Services

Field Services

Expedio can additionally provide your company with highly experienced IT and geo-scientific personnel to assist you with your field service requirements, from our offices or based on your site.

Providing innovative software and hardware solutions is what keeps Expedio at the forefront of all field service requirements ensuring client focus on their core business.

TOUGHBOOK

We provide Toughbooks with accessories and carry a range of components and spare parts ensuring your work output is always on track.

We will even recondition tired Toughbooks and get them ready for the next field session. Whether you choose to hire or purchase outright is your choice and we provide technical support to your field staff.

Expedio will build your data logger utilising existing logging templates and library lists and we will provide assistance in the collection of additional data that could be useful to you. Expedio provides full OCRIS configuration and support so that your data merges seamlessly into the corporate database every time.

With OCRIS and Panasonic Toughbooks your workforce is equipped with a comprehensive rugged field kit, guaranteeing efficient data collection at all times.

**Software + Hardware + Support
= OPTIMUM PACKAGE**

- ✓ **We build your field service solution from the ground up**
- ✓ **We customise, maintain and support your system**

Expedio Field Logging Solutions – Bridging the gap between Worksite and Office
